

Please bring your own mouth and nose protective mask and put it on BEFORE entering this doctor's practice!

Dear Patients,

To keep the risk of infection as low as possible, it is imperative that you bring your own mouth and nose protective mask and put it on BEFORE entering this doctor's practice.

If you do not have your mouth and nose protective mask with you and infect someone, the medical practice may have to be closed immediately. You could infect all people in the medical practice: the other patients, the ordination staff, the doctor.

Your mask will only fit properly if both your mouth and nose are completely covered. This prevents droplets from reaching others when you speak, sneeze or cough.

Please act responsibly. For your own protection and to protect your fellow human beings.

**Thank you very much for
Your prudent behavior!**
